Let's dive in and recover your Crypto.com peace of mind.

## Why You Might Need to Reset Your Crypto.com Password

Crypto.com does not use a traditional "password" like banks do. Instead, it uses a 12-word recovery phrase—also known as the seed phrase—to access your wallet. However, if you've set up additional security like a passcode or biometric lock and forget it, you'll need to reset access.

Common scenarios include:

- Forgetting your passcode

- Resetting your phone

- App crashes or reinstall

- Changing devices

In any of these situations, your 12-word recovery phrase is key to getting back in.

## How to Reset Crypto.com Password (Step-by-Step)

If you've forgotten your passcode but still have your 12-word recovery phrase, follow these steps:

✅ Step 1: Uninstall the Crypto.com App

This removes the existing (locked) configuration from your phone.

✅ Step 2: Reinstall the App

Go to the App Store (iOS) or Google Play Store (Android) and download Crypto.com again.

✅ Step 3: Open the App & Select "I Already Have a Wallet"

Don't create a new wallet—tap "I already have a wallet" to import your existing one.

✅ Step 4: Select Wallet Type

Choose the correct wallet type (usually Multi-Coin Wallet).

✅ Step 5: Enter Your 12-Word Recovery Phrase

Type your phrase exactly as you saved it. Spelling and word order must be perfect.

✅ Step 6: Set New Passcode or Biometric Lock

Once your wallet is restored, you can set up a new passcode, Face ID, or fingerprint.

🔔 Important: If you've lost your 12-word recovery phrase, there is no way to recover the wallet. You must contact Crypto.com support immediately at 📞 +1 617-540-4512 for further guidance.
